

Mission & Value

Persal & Co Power Pty Ltd is an independent, privately owned and operated Queensland based electrical contracting company. We are fully certified to ISO Standard, with over 45 years' experience in the construction and installation of HV overhead transmission and distribution power lines. and associated cables. We construct using wood, concrete and steel poles.

Persal & Co have constructed over 3,000kms of 66kV and 132kV transmission lines, and 11kV, 22kV & 33kV distribution lines, for clients such as BHP, Anglo American, Peabody, Coronado, Ergon and Powerlink (and their predecessors). In doing so we have developed strong and enduring relationships with those customers, core suppliers, subcontractors, and regulatory bodies.

Persal & Co operates in three different locations with our head office, workshops and storage depot in Maryborough and our office, workshops and storage depot's central to major coal mining operations at Moranbah & Blackwater. In all three locations we have an extensive on hand inventory of power line conductor, cables, equipment and fittings. Our company owns a large fleet of modern plant and equipment unique to the power industry, which facilitates our ability for a quick, timely, and cost-efficient response, to the needs of our customers.

Persal and Co have a proven ability to design, supply and construct transmission and distribution power lines. The highest quality standards are always maintained during construction, and for the operating life of the power lines, with a continual focus on the health and safety of all persons performing and affected by our work. With significant consideration placed on the environmental aspects and impacts of our work, in the power line corridors and adjacent areas.

At Persal & Co we are proud of the continual relationships we maintain with our customers and their willingness to recommend us to future customers. We have no doubt that this is a direct result of the responsible and professional way we conduct our business.
